

Pacific Infrastructure Conference 2010

Auckland, September 21 & 22

You need to attend this conference if your business wants to take advantage of the significant opportunities in infrastructure projects across the Pacific.

New Zealand Trade & Enterprise and the Australian Trade Commission are working together to deliver a comprehensive conference program to support the NZ Pacific Business Council's Pacific Trade Conference & Expo 2010.

The focus for this conference is *Infrastructure across the Pacific*. Without doubt the Pacific has an infrastructure deficit that has impacted on the economic development of our region.

This conference brings together speakers from throughout the Pacific nations that influence our future growth through, projects, policy and investment.

The conference will for the first time bring together the decision makers of the region and provide an environment for active networking and information sharing.

Format

- Eight sessions will be presented over a two day period. Each session will have a theme, with two speakers.
- A panel discussion with Q&A will be held at the conclusion of each session.
- Business to Business meeting will be interspersed throughout the program. These will be created through electronic registration system.
- Networking opportunities will be available throughout the day and coordinated to link with the exhibition and exhibitors.

Content

Economic Landscape for the Pacific – the impact of the GFC and the forward forecasts. Presented by a leading economist.

What is the PNG Gas Rush all about? These sessions will deliver information from those closest to the projects.

Powering the Pacific

Discussing the developments and requirements to enable and support economic growth across the region.

Energy Development in Island Nations (EDIN)

An international partnership, EDIN aims to advance the deployment of renewable energy and energy efficiency technologies in islands across the globe. By bringing together policy advisors, technical experts, and financial leaders, EDIN works to guide clean energy development and deployment in specific regions and islands.

Partners in the international partnership for Energy Development in Island Nations (EDIN) are countries that strive to deploy renewable energy and energy efficiency technologies and help islands attain specific, measurable clean energy targets.

Tourism and Sustainability and the Economic Impact in the Pacific

The footprint of the Pacific is going to be driven by sustainable development. The work has begun with projects across the Pacific in tourism infrastructure. We will look at these projects and explore the challenges and opportunities coming from the new paradigm.
